

STEL Lucia LED Portable Link Lighting

LONG DISTANCE TEMPORARY FLOODLIGHTING

Lighting long stretches of road, rail track or tunnel is now easier and more efficient than ever with the STEL Lucia Link Lights.

The STEL Lucia LED Portable Link Lighting is perfect for use in the Rail Industry for temporary lighting of access and maintenance projects, along with the construction industry for lighting long stretches such as motorway and rail.

The STEL Lucia LED Portable Link Lighting avoids the expense of bulky lighting equipment, with excellent cost savings against tower lights, the STEL Lucia LED Portable Lighting will provide over 500 metres of efficient lighting from a small, single 3KVA generator.

Input voltage	AC 100 - 240
Input frequency	50 - 60 Hz
Safety level	Class 1
Rated power	30 Watt
Lamps lumens	3600 lms
Colour	6400K
Whole light angle	180°
Working temp	-22°C / +55°C
Light IP rating	IP67
Plug IP rating	IP44
LED lifetime	30,000 hrs
Size	64cm x 11cm x 6.5cm
Weight	1.3 Kg

Lucia light	LUCIALED
Mast	MAST2
Basket	STACKBAST

Safety notes

Before using the STEL Lucia LED Portable Link Lighting, check that the electrical supply [generator] or other is suitable and will give a reliable and consistent supply of power.

Check that the plug is not damaged and that the cable is properly secured with no internal wires visible.

Check the electrical cable is not damaged and has not been repaired with insulating tape or an unsuitable connector.

Damaged cables should be replaced with a new cable by a competent person, before using the light. Check that the outer cover of the equipment is not damaged in any way.
